

GOLDEN AGE

DIBOND® mayan-gold-metallic DIBOND® butlerfinish gold

NEW

The new gold colours –
exclusively from **ALCAN COMPOSITES**

Always as good as gold!

When using the new DIBOND® gold colours, you will be stepping on the golden path to success.

DIBOND® mayan-gold-metallic and **DIBOND® butlerfinish gold** are the latest additions to the **DIBOND®** range, offering the same well known benefits of quality and ease of fabrication. They are therefore always a valuable asset.

These new surfaces may be used in almost any field where a sophisticated and attractive surface is needed i.e.:

- for signs and displays
- in exhibition building, shop-fitting and interior decoration
- for POS / POP applications

DIBOND® mayan-gold-metallic:

DIBOND® *mayan-gold-metallic* is a new colour from the polyester lacquer program (coil-coated) with a gloss grade of app. 30-35%.

DIBOND® butlerfinish gold:

The surface of DIBOND® *butlerfinish gold* receives its look thanks to the rolled on brushed appearance and a pigmented translucent lacquer.

General: Same screenprint properties as DIBOND®. Digital LFP (Large Format Printing) on DIBOND® *butlerfinish gold* results in highly attractive prints. A clear lacquer system has a reduced UV-resistance compared to an opaque system.

Delivery program DIBOND® mayan-gold-metallic and DIBOND® butlerfinish gold:

Thicknesses: 2 mm, 3 mm, 4 mm

Formats:	1250 x 2500 mm	1500 x 3050 mm
