## POWIS PRINTER®

The PowisPrinter® is flexible, versatile and user-friendly. It works with its own keyboard. A variety of popular fonts in as many as ten different typefaces gives you excellent design flexibility. Or you can connect it directly to your PC and use virtually any resident font. Even more, you can scan your company logo or other graphics and print them right on the document's spine and match the foil colors to your custom-printed Foilfast™ cover. Either way, the PowisPrinter® gives your document — and your company — instant identity, image and recognition.
